

DOUGLAS MARIONES

PRODUCT OWNER | TECHNOLOGY PROJECT MANAGER | AI-ASSISTED PRODUCT DEVELOPMENT

Valinhos, SP, Brazil | +55 (19) 99995-6971 | douglas.mariones@icloud.com | linkedin.com/douglasmariones

PROFESSIONAL SUMMARY

Product Owner and Technology Project Manager with 15+ years of cross-functional experience and 5+ years leading ERP, digital transformation and enterprise product initiatives. At AB InBev, combines global ServiceNow product ownership with SAP S/4HANA program analytics, learning enablement and AI-assisted digital product development. Converts complex processes and fragmented data into governed workflows, measurable KPIs, executive decision support and interactive web applications. Fluent in English, with experience leading bilingual workshops, kick-offs, onboarding and training for multicultural teams.

CORE EXPERTISE

Product Ownership | Digital Transformation | Generative AI & Rapid Product Development | Product Discovery | Process Mapping & Redesign | Roadmaps & Backlog Prioritization | ServiceNow / ITSM | SAP S/4HANA | Data Analysis & KPI Design | Executive Dashboards | Learning Experience & Enablement | Change Management | Global Stakeholder Management | Agile & Hybrid Delivery

PROFESSIONAL EXPERIENCE

Product Owner & Technology Project Manager | AB InBev | Apr 2023 - Present

Global SAP S/4HANA Transformation Program

- Own the global ServiceNow ITSM catalog and product backlog, leading a 2-developer team and governing incident/request services, queue ownership, SLAs, prioritization and continuous platform evolution across multiple countries.
- Designed the ServiceNow-Azure DevOps integration that automates Problem creation into DevOps area paths, improving traceability between operational support and product delivery.
- Built Hypercare dashboards in ServiceNow to monitor post-go-live stabilization of SAP rollouts and provide program teams with actionable visibility into operational issues.
- **Program Performance Intelligence:** designed and built an AI-assisted executive performance intelligence web application for the SAP S/4HANA program, consolidating Build, Design/CORE, Deploy, Test, Cutover and Change Management data into year-over-year productivity, capacity, workload and confidence views with Workstream drill-downs.
- **Decision Analytics:** defined analytical business rules and KPI methodologies for cross-period comparison, including output/FTE, test productivity, time-window normalization and composite performance indices; translated evidence into executive hypotheses and questions without overstating causality.
- **Learning Enablement Toolkit:** designed and built an AI-assisted SAP Learning Hub onboarding experience with guided navigation, searchable content, Learning Journey and certification guidance, FAQs, glossary, support decision flows and self-service resources.
- **SAP Activate Learning Academy:** designed and built a skills-based SAP Activate learning application with progress tracking, quizzes, practice scenarios, notes, error review, personalized study planning, backup/restore and responsive UX for desktop, tablet and mobile.
- **AI-Assisted Product Building:** applied generative AI throughout research synthesis, information architecture, UX iteration, content structuring, data analysis and HTML/CSS/JavaScript implementation, while retaining ownership of requirements, validation, business logic and final decisions.
- Lead end-to-end discovery and process flow mapping with internal and external stakeholders; define roadmaps, backlog priorities, OKRs/KPIs and scalable operating models. Structured SAP Learning Hub / corporate university initiatives, led kick-offs and training in Portuguese and English, and launched an internal transformation podcast with program leaders and specialists.

PMO | Project Manager | Agroambiental Jardinagem e Paisagismo | *Dec 2020 - Mar 2023*

- Led SAP Business One ERP implementation across Finance, CRM, Sales, Purchasing, Inventory, Production, MRP, HR and add-ons, coordinating requirements, process design and delivery with stakeholders and external partners.
- Ran discovery sessions and business process mapping/redesign, managed backlog and delivery planning across simultaneous initiatives, and built Power BI / Excel dashboards to support leadership decisions.
- Managed external-vendor app delivery for PPE management and workforce / green-area operations, translating operational needs into product requirements and implementation plans.
- Led LGPD compliance, data governance and cybersecurity-control initiatives while overseeing taxation, NCM classification, inventory, AP/AR, billing and commercial performance tracking.

Senior Financial Analyst | Profilax Saúde Animal | *Jan 2018 - Nov 2020*

- Digitized manual financial controls into ERP and Excel-based workflows and built management reports and dashboards to improve leadership visibility.
- Managed accounts payable/receivable, cash flow, reconciliation and billing operations, combining financial control with continuous process improvement.

Billing Analyst | Profilax Saúde Animal | *Jun 2009 - Dec 2017*

- Managed billing, accounts payable/receivable and financial reconciliation, while initiating the digitization of manual finance controls.

TOOLS & TECHNOLOGY

Enterprise & Data: ServiceNow, Azure DevOps, Power BI, Advanced Excel, SAP S/4HANA, SAP Business One, SAP Learning Hub, Microsoft 365

Generative AI & Web Product Building: ChatGPT, Claude, Microsoft Copilot; AI-assisted HTML, CSS and JavaScript prototyping; Chart.js; SheetJS

AI-ASSISTED PRODUCT DEVELOPMENT

Discovery & Product Framing: Structure ambiguous business problems into user needs, process flows, requirements, business rules, MVP scopes and decision criteria before prototyping.

Analytics & Decision Intelligence: Normalize fragmented data, define KPI formulas and comparability rules, build diagnostic views and convert patterns into evidence-based hypotheses for stakeholder validation.

UX & Rapid Web Prototyping: Create responsive browser-based experiences with AI-assisted HTML, CSS and JavaScript, using iterative prompts, visual QA, Chart.js and SheetJS where appropriate.

Learning Product Design: Translate complex enterprise knowledge into guided learning paths, self-service support, quizzes, practice scenarios, progress tracking and targeted review experiences.

Human Validation & Governance: Use generative AI as an accelerator while retaining ownership of source validation, confidentiality, business logic, acceptance criteria and final decisions.
